

VI

Dear readers,

Proceedings of the Faculty of Economics and Business in Zagreb is an internationally relevant and reputable journal that for many years publishes scientific and professional papers in the field of economics and business economics, contributing to the important and leading role of the Faculty of Economics and Business in Zagreb in disseminating knowledge and promoting economic science. The new edition of the Proceedings brings together many scientific and professional papers dealing with different topics from the field of economic science, and contributes to the understanding and study of particular thematic areas. In this issue, there are also several scientific papers from the 7th South East European Meeting & Scientific Conference of Management Departments, organized by the Department of Organization and Management at the Faculty of Economics and Business, University of Zagreb from 22 to 23 September 2017. About 200 scientists and experts coming from twenty faculties and other scientific institutions in South East Europe, working in the field of management, organization and entrepreneurship attended the conference. Beside invited lectures, presentation of departments and meetings of department members, a scientific conference entitled Management Education and Research in the Upcoming Epoch: Rethinking Discipline and Reconceptualization Modes of Creating Knowledge was held.

In 2018, unfortunately, emeritus professor Mato Grgić, a long time editor of the Proceedings, passed away. Professor Grgić was the initiator and the first Editor of the Proceedings. Under his leadership, 18 issues of the journal were published. Insisting on high quality of papers, inclusion into important quotation bases and the overall direction of journal development is a great merit of professor Grgić. His desire was to publish quality papers to respond to the needs of economic science and the economy as a whole. We hope that this, as well as future issues of the Proceedings will publish quality papers that will answer many of the research questions and problems, and continue to be a representative source of information and knowledge in the field of economic science for the scientific and professional community in Croatia and beyond.
